

Environmental Management Policy

Mission

Samyang Biopharm continuously discovers and improves factors that affect the environment to protect it and contribute to the rich and convenient life of humanity.

Management Policy

- Diligently comply with domestic and overseas environmental laws, regulations, and standards and perform corporate social responsibility by cooperating with eco-friendly policies of the nation and institutions.
- Efficiently manage resource and energy consumption to minimize carbon emissions and actively endeavor to achieve the goal of carbon neutrality by 2050.
- Minimize the occurrence of waste and pollutants and increase resource recycling.
- Through education and training on all employees and partner companies, strengthen the sense of environmental management and encourage active participation.
